

Procedure to load prefix/suffix into DelfiScan C51 & C71

***As default ENTER suffix is loaded into the scanner.**

If you don't want this ENTER suffix loaded into the scanner meanwhile the "down" suffix has been loaded, the ENTER suffix needs to be removed before that.

First, download the following guide:

<http://www.delfi.com/SupportDL/Delfi/Manuals/DelfiScan%20M71/DelfiScan%20M71%20Manual.pdf>

Procedure to remove the ENTER suffix (disable suffix):

- Go to page 28
- Scan 'Program'
- Scan 'Record Suffix'
- Scan Option Code 'o' on page 53
- Scan 'FIN (Finish)' on page 54
- Scan 'END' on the same page

Procedure to add suffix, e.g. suffix "down":

- Go to page 28
- Scan 'Program'
- Scan 'Postamble'
- Go to page 49
- Find The ANSI description to the HEX/ANSII table
- *The designation for "Down" is 'GS'
- Find 'GS' in the HEX/ANSII table on page 67 (start with the numbers in the upper row)
- *'GS' is 1D
- Scan '1' and 'D' on page 53
- Scan 'FIN (Finish)' on page 54
- Scan 'END' on the same page
- The "Down" suffix has now been loaded into the scanner
